 LinkedIn: **Ahammed Istiak Alam Efty**

PROFESSIONAL SUMMARY

A dedicated and growth-oriented Computer Science student with a strong interest in software development and problem-solving. Known for adaptability, teamwork, and clear communication. Passionate about learning new technologies and applying academic knowledge to real-world challenges while continuously improving technical and professional skills.

EDUCATION

Daffodil International University
Bachelor of Science in Computer Science & Engineering

Expected Graduation: 2028
Dhaka, Bangladesh

Comilla Victoria Government College
Higher Secondary Certificate (HSC)

Year : 2023
Cumilla, Bangladesh

Comilla Modern High School
Secondary School Certificate (SSC)

Year : 2021
Cumilla, Bangladesh

ACADEMIC & PRACTICAL PROJECTS

Smart Fire Detection System

Nov 2025

Our project uses smoke and heat sensors to detect fire hazards and ensure building safety. Once a risk is identified, the system triggers alarms to alert occupants for quick evacuation, helping prevent accidents and showcasing practical electronic safety systems.

Logistics & Delivery Monitoring Platform

Jul 2025

Our project manages and monitors the entire delivery process in an organized way. It handles order details, delivery personnel, and delivery status efficiently. The system helps reduce delays, minimize errors, and improve overall delivery performance. It ensures reliable, timely, and well-managed delivery services.

Academic Record Management System

Dec 2024

Our project is designed to efficiently store and manage student information in an organized manner. It maintains academic records, attendance, and personal details with improved accuracy. The system reduces manual paperwork and provides quick, secure access to data for students, teachers, and administrators. Overall, it improves transparency, data security, and institutional management.

Campus Transport Planning System

Nov 2025

This project focuses on designing an efficient University Transport System that ensures safe, reliable, and well-managed transportation for students and staff. It aims to reduce time wastage, improve route management, and enhance overall campus mobility through proper planning and system organization. The project highlights practical problem-solving skills and real-life application of technical knowledge.

COMPETITIONS

- › Mathematics Competitions
- › Scholarship Competition
- › Participated in DIU Science Olympiad
- › Participated in Take-Off Contest at Daffodil International University
- › Participated in The Algorithm Contest at Daffodil International University

LEADERSHIP & VOLUNTEER EXPERIENCE

DIU Job Utsob 2025

Member — Nov 2025

Daffodil International University

DIU Mathematical Society

Office Secretary — Apr 2025

DIU Mathematical Society is a student-driven academic organization of Daffodil International University that promotes interest and excellence in mathematics. It organizes seminars, workshops, competitions, and training programs to enhance problem-solving, analytical skills, and teamwork, inspiring students to apply mathematics in academics and real-life challenges.

SKILLS, TECHNOLOGIES, LANGUAGES & INTERESTS

- **Skills:** Object-Oriented Programming; Web Development; Algorithm; Data Structures; Programming Fundamental; Strong analysis thinking; Real-life problem solving; Mathematical applications in programming
- **Technologies:** C(currently practicing); Python(basic); Visual Studio Code; Git(basic Knowledge); HTML(learning); CSS(learning); Java(learning)
- **Language:** English & Bangla
- **Interests:** Programming; Mathematical and logic puzzles; Robotics; Game development; Web development
